

### **AMENDMENTS TO THE SPECIFICATION**

A substitute specification is attached, with an abstract, in both marked-up and clean form. Kindly enter the substitute specification and abstract attached hereto as Attachment A.

Also attached, as Attachment B, is a copy of the substitute specification and abstract showing all the changes, including the matter being added to and the matter being deleted from the specification and abstract that form part of the international application upon which the present application is based (PCT/SE2005/001194).

The specification and abstract changes reflected in the attached substitute specification include the addition of the preferred subheadings at appropriate places within the specification, and they also include minor corrections, including corrections to improve the form of the application. None of the changes made in the substitute specification and abstract introduces new matter because each change is based upon the international application in the form in which it was filed, including the specification, abstract, drawings, and claims.
